# DURELL FLOORING

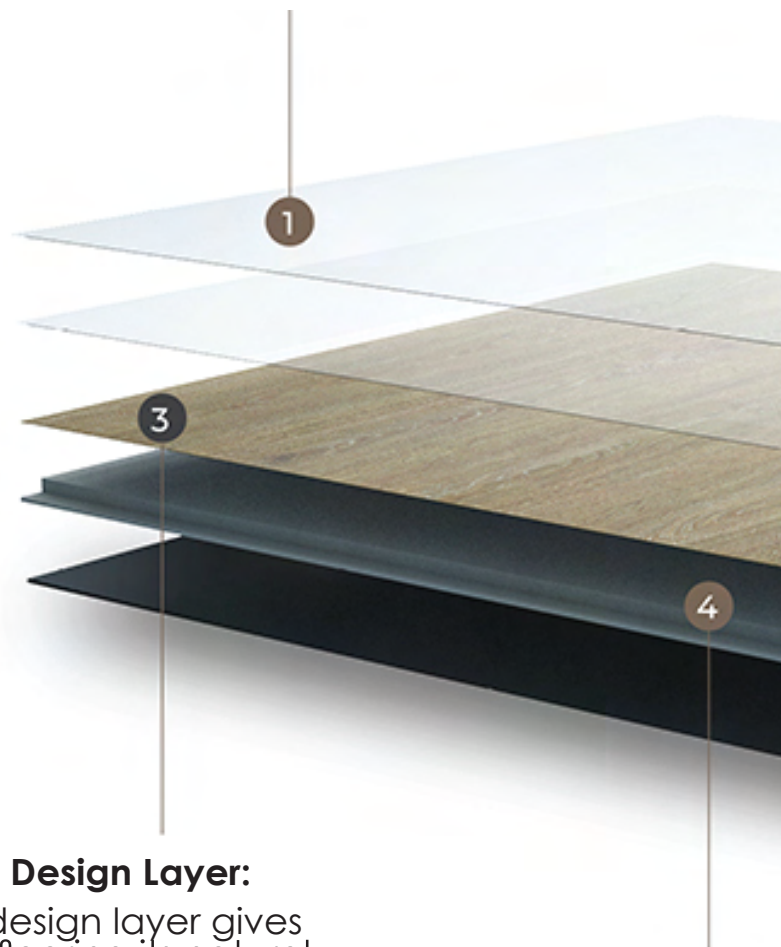

Durell Flooring is a full service company and your partner in transforming spaces into captivating, functional, and welcoming environments. Our flooring solutions are tailored to meet contemporary design and lifestyle needs, enhancing the overall ambiance of your spaces.

The foundation at Durell Flooring is built on quality. Recognising that each square foot of our flooring bears aesthetic and functional expectations, we blend cutting-edge technology with a customer centric service. This fusion results in flooring solutions that stand the test of time.

## UV Coating:

The UV coating improves the flooring's stain resistance and prevents colour fading

## Design Layer:

The design layer gives the flooring its natural appearance

## SPC Rigid Core:

The core layer gives the flooring its stability and locking

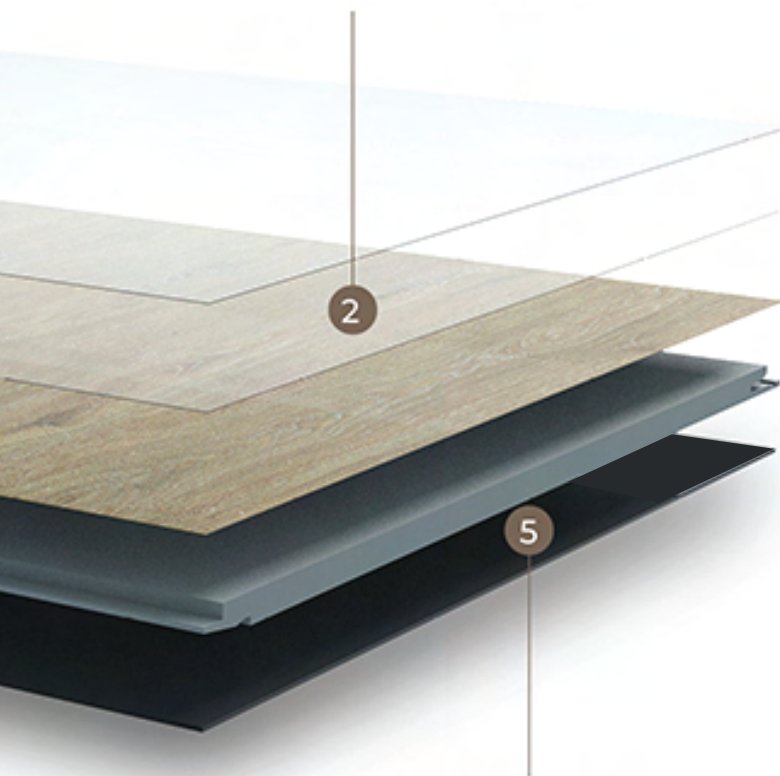

## SPC TECHNOLOGY

Stone Polymer Composite flooring is a highly durable, waterproof, rigid core, easy to maintain composite flooring. It ensures robustness and impact resistance along with unparalleled underfoot comfort.

Manufactured through a multi-layer extrusion process under high heat and pressure, the wear and design films meld seamlessly with a rigid core and cushioned back. The mechanical interlocking technology accelerates installation without the need for chemicals or cement. What's more, it's easily replaceable and 100% recyclable, making it the eco-friendly choice anytime you choose to upgrade.

### **Wear Layer:**

The wear layer protects the flooring from abrasion, wear and tear

### **IXPE Backing Layer:**

The IXPE bottom layer provides underfoot comfort and sound insulation

# CLASSIC WOOD COLLECTION

Immerse yourself in the timeless beauty of our Classic Woods collection, where each plank tells a story of enduring style and timeless tradition. Inspired from the finest oaks, these floors exude warmth and sophistication, creating an inviting ambiance and adding a touch of grandeur to your living spaces.
